

Hey! This is Nur. I'm 21 years old and English Language Teaching student at Uludag University. This summer break, I attended a volunteering project in Poland and now I'll mention about my journey.

My journey started in June and ended in October

- Supporting in regular activities and events of the Cultural Center
- Supporting in preparation of cultural events and music festivals (including photoshoot and promotional videos)
- Leading and preparation of language learning activities for children during summer holiday
- Assisting the local teachers during activities

Thanks to this project, besides professional experience for my major, I explored a lot not only the country but also myself. I travelled a lot, helped a lot. Of course it's also a big challenge. Cause you're alone in a country and handle with everything on your own. But that's the point. That's the way of learning, getting experience and self-confidence.

The project was unforgettable for me and will be always like that for me. I was working with Culture Center of Narewka's women. They are all strong and I was lucky and happy with them as strong woman. There's nothing a woman cannot do if she wants. And now, after this project I know that I can do everything and live in everywhere without doubt. That's what the volunteering gives you. While helping people, they also help you a lot for your future life even if you realize after that.

Thanks a lot for this opportunity to first, European Solitary Corps and ANAWOJ. Then GOK Narewka to being my family in Poland and lastly, Gönüllü Hizmetler Derneği for their help.
